**DOES NOT COMPLY WITH THE
SEQUENCE RULES. See reasons below.**

On page 6 and page 10 and in Figure 2, Figure 3, and Figure 6, sequences encompassed by the sequence rules are disclosed but not identified by SEQ ID NO as required by the sequence rules. Moreover, Claim 11 contains primers not identified by SEQ ID NOs. No Sequence Listing (the paper copy, the electronic copy or CRF, and the Statement that the two are identical) is present in the case. A complete Sequence Listing for this application that includes the human beta-actin gene identified by a SEQ ID NO: must be provided. See 37 CFR §§ 1.821 – 1.825

Additionally, the inclusion of GenBank Accession Number M10277 in the claims can also be considered a sequence disclosure and Applicants may chose to further comply with the sequence rules for this sequence as well.
